Hi, my name is Jerome Abelida, but you can call me Rome. I'm a web developer and hardware freelancer while currently between full-time roles. I specialize in Ruby on Rails, Laravel, and the MERN stack. I also have a strong interest in robotics and machine learning.

I graduated in 2024 with a Bachelor of Science in Computer Engineering from Colegio de Montalban. In my free time, I enjoy reading books on machine learning and studying independently. I also love playing classical music on the piano.

I'm excited to begin this journey as a Staff Consultant at RIA Advisory, especially in a role that involves testing, Oracle, and C2M. I look forward to learning, contributing, and growing with all of you.
